An Important Capture.

Tucson Citizen.

A year or eighteen months ago a party named Uligio Moreno stole some horses in this county, among others one belonging to Frank Oury and another owned by W. S. Sturgis. Hunt was instituted for him and he was found near Arivaca by Deputy Sheriff George Bowen.

Moreno was on horseback, and instead of holding up his hands when ordered to, put spurs and started off, soon to be stopped by a loud backshot, killing his horse. He got away, however, and from time to time the Sheriff's force have heard of his being seen and have been watching for him. Yesterday Sheriff Shaw spied his man at the rodeo beyond San Xavier, this time on foot, and when ordered to hold up his hands he protested did so. He is a dangerous party, and Sheriff Shaw congratulated him if in the capture. Moreno about two years ago cleaned out Junction Station, under the charge of Mrs. E. C. Wood, shooting a man named Moore at the time.

THE CIRCULATION OF THE REPUBLICAN is larger than that of any other two daily newspapers in Arizona combined.

A PARTNER'S ROW

Culminates in the Killing of One by the Other.

From the Tombstone Epitaph.

Early yesterday morning Fred H. McGowan arrived in this city from Morse Canon, in the Chiricahuas, and gave himself up to Sheriff Slaughter, saying that he had killed Patrick Dawson at that place last Monday morning.

McGowan owns a ranch in Morse Canon and he and Dawson were partners in the proceeds. McGowan says that last Saturday Dawson drove him away from the ranch and threatened to kill him. He remained away that night, but returned between 4 and 5 o'clock Monday morning, accompanied by a double-barreled shotgun. He got close to the house and waited until Dawson came out, when he emptied both barrels of the gun into him and then went into the house and got a Winchester rifle and put a bullet through the body.

A coroner's inquest was held and the jury returned the verdict of justifiable homicide. McGowan then came to this city and is now in the county jail awaiting examination, which will take place before Justice Johnson next Wednesday at 2 o'clock p. m. The prisoner seems entirely unconcerned as to the examination and is confident that he will be released, as he claims he did the killing in self-defense.

Inquest on Foster's Body.

Tucson Citizen.

The coroner's inquest of George Foster met this morning at 10 o'clock, and important testimony was adduced.

Some Mexican boys testified that they saw Foster under some cottonwood trees back of the Ochoa place, asleep, his shoes and coat off. He was lying on the coat, using the shoes as a pillow.

Dr. Spencer testified that he did not drown, as there was no water in his lungs. Examination of the stomach revealed no crystals of strychnine, but an analysis showed the presence of the drug in quantities sufficient to kill, though how much can only be estimated by the quantity missing from the bottle, some seven or eight grains. The doctor says that persons poisoned with strychnine have no desire for water, and that the only reason that the deceased could have for entering the stream would be to make death sure, if not from poison, from drowning. Unimportant witnesses were examined, and the inquest was again postponed until Monday next, at 10 o'clock.

HOFF, OF TUCSON!

BELOW IS A CUT OF THE TERRITORIAL KNOWN CHARLES F. HOFF, COMMONLY known as HOFF, OF TUCSON. Mr. Hoff is Manufacturer's Agent and Merchandise Broker, with headquarters at Tucson. He is the gentleman that has agitated the windmill question so much, the results of which are being seen all over the Territory, and which is turning the barren deserts into blooming gardens.

THE AERMOTOR WINDMILL

Shows an increase of 35 per cent in power over all other mills. The wheel is entirely of STEEL. Sun, Rain or storm therefore have no effect on the same.

It is sold with or without TILTING TOWERS. FIXED TOWERS are the cheapest, but the TILTING TOWER is the most convenient; same brings the wheel down to the ground for oiling. Think of it! the wheel comes down to you.

The AERMOTORS have from 4 to 16-inch strokes. Three revolutions of the wheel to one stroke of the pump allows it to start up easier under a heavy load, and runs when other wheels are idle, not being "quite" sufficient wind to run other mills. The wheel itself being so light, runs so much faster when started, and thus gains more in speed than it loses in the stroke. But these are only a few reasons why the AERMOTOR is superior in power, construction and durability to all other wind-motors. However, so far as the power of the wheel is concerned, the greatest

gain in power is due to the structure of the wheel itself. To specify ALL the reasons for this would be too tedious. Suffice it to say that this claim is based on numerous dynamometric tests on more than sixty different wheels, and that the AERMOTOR has been submitted to long and applied practical tests, in conjunction with the leading wind-motors of the country, and it has been proven by actual trial and measurement that the AERMOTOR will pump more water in the same time, in any kind of wind, and will do the same work in lighter wind than the best of 16-foot wooden wheels made. The AERMOTOR WIND ENGINE, without exaggeration, is the greatest invention of the nineteenth century, and every home in Arizona should have one, as a home without a windmill is like a library without books, a home without a soul.

CHARLES F. HOFF, Agent, Tucson, Arizona.
